

Sponsor the Future: The wA11y™ Impact Kit

Inclusive by default. Intelligent by design.

by **Claudia Kich**

Our Mission

Provide free, AI-powered, accessibility-first tech education to women with disabilities, neurodivergence, or who are rebuilding after trauma, poverty, or exclusion from traditional systems

Breaking Barriers

WAI11y™ creates pathways for women with disabilities and those from underrepresented backgrounds.

Supporting Caregivers

Our flexible program empowers single mothers and caregivers to pursue tech careers on their terms.

Embracing Diversity

We welcome Immigrants, refugees, First Nations, and Indigenous women into a supportive tech community.

Inclusive by Design

Our platform is built for all women, including queer, trans, and survivors of trauma.

We don't teach women to fit into tech. **We build tech that fits all women.**

What Makes wA11y™ Different?

AI-Powered Learning

Our custom engine **ALMA™** adapts to each woman's unique learning style and pace.

Trauma-Informed Approach

Emotionally safe environments where every voice matters in shaping our curriculum.

Real-World UX Projects

Build hire-ready portfolios while receiving 1:1 mentorship from industry professionals.

Accessibility-First Design

Every aspect of our platform, pedagogy, and tools prioritizes inclusive access.

We don't just remove barriers — we redesign the path.

What Sponsors Help Build

Full scholarships

Removing financial barriers to education

Childcare + mental health support

Addressing crucial needs for student success

Licensed software + tools

Providing industry-standard resources

Mentorship Programs + Career Coaching

Providing industry-standard resources

wA11y Labs™ for R&D and accessibility testing

Our in-house accessibility research and design hub

Expansion of the ALMA™ Engine

Personalizing education at scale

Who Sponsors Support

Your sponsorship directly supports underrepresented communities in tech, creating pathways to economic independence through digital skills.

Immigrant & Refugee Women

Building new careers and economic stability in their adopted home.

Indigenous & Racialized Women

Addressing historical barriers to tech education and employment.

Queer & Trans Women

Creating inclusive spaces where identity is respected and celebrated.

Neurodivergent Learners

Leveraging unique thinking styles through adaptive, personalized education.

Survivors of Violence

Reclaiming independence through trauma-informed learning environments.

Low-Income Women

Breaking cycles of poverty for themselves and their families.
